Pulse Sequencing

- Spin Echo自旋回音 (SE)
- Fast Spin Echo快速自旋回音 (FSE)
- Gradient Echo梯度回音 (GRE)
- Echo Planer Imaging回音平面造影 (EPI)

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

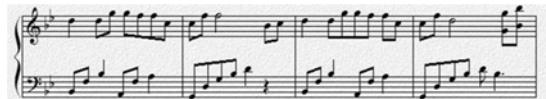

2/18/2017 Lesson 1_2, Chia-Feng Lu

2

Pulse Sequence Diagram, PSD

- The sheet music (樂譜) of MRI
 - Arranging the tone, timing, and duration for each component.
- The instruments (樂器) in MRI are...
 - Transmitting RF coil (transmit RF pulse)
 - Slice-selective gradient coil
 - Phase-encoding gradient coil
 - Frequency-encoding gradient coil
 - Receiving RF coil (receive echoes)

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

3

The goal of PSD

- Just like that the sheet music aims to form a beautiful melody for the concert.
- PSD aims to fill out a full K-space for MR imaging!

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

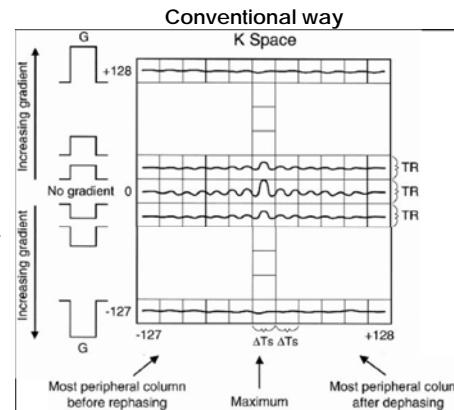

4

K-Space properties

- Each of the signals has its maximum signal amplitude in the center column.
- The maximum amplitude occurs in the center row because this line is obtained without additional dephasing.

1 K-Space matrix → 1 MR image

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

5

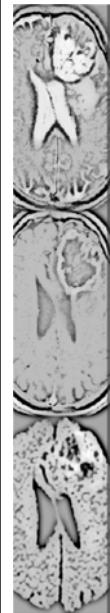

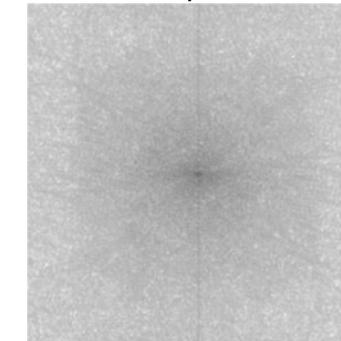

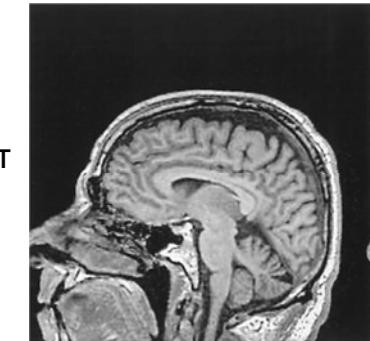

Image of K-Space

K Space

2D FFT
→

Reconstructed Image

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

6

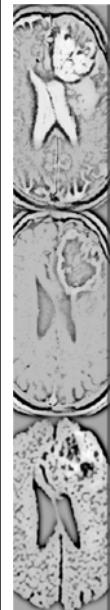

The Question now is ...

- How to fill out the K-space matrix...
 - Control frequency-encoding gradient for the x-axis (columns) of K space.
 - Control phase-encoding gradient for the y-axis (rows) of K space.
 - The image contrast is determined by TR, TE, and flip angle.

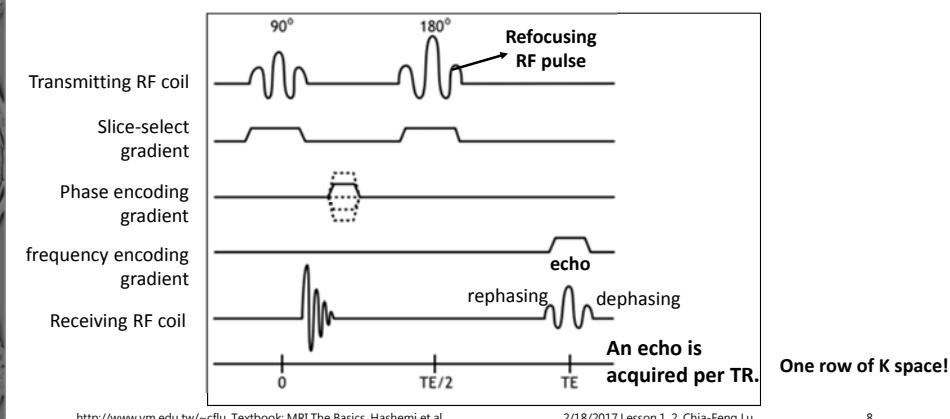

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

7

Spin-echo pulse sequence diagram

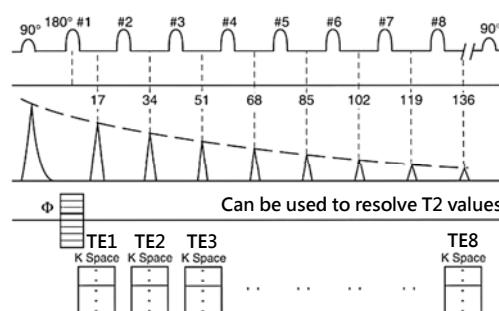

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

8

Multi-echo spin echo

- Fill each echo into the distinct k-space.
- For an eight-echo train, we get eight different images.

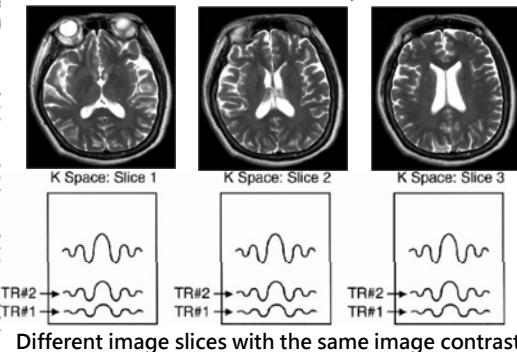

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

9

Multi-slice Acquisition in a TR

We excite different slices in each TR;
We use the same magnitude of G_y in each TR

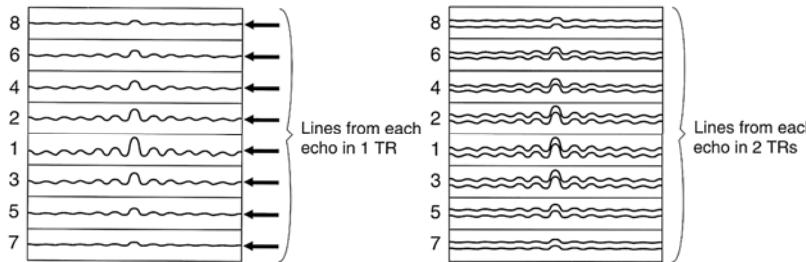

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

10

Fast spin echo (FSE)

- We will only have one k-space. We'll fill this k-space eight lines (eight-echo train) at a time with eight different phase-encoding strengths.

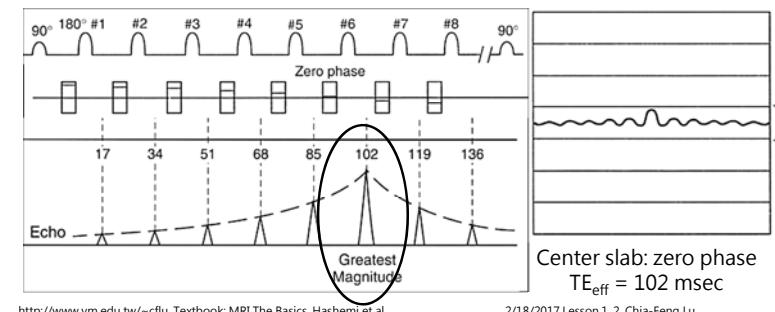

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

11

Fast spin echo

- In FSE, before each 180° pulse, we place a different value of the phase-encoding gradient.
- For the 180° pulse before the echo we choose as the TE_{eff} (in this case, 102 msec), we use a phase-encoding gradient with the lowest strength.

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

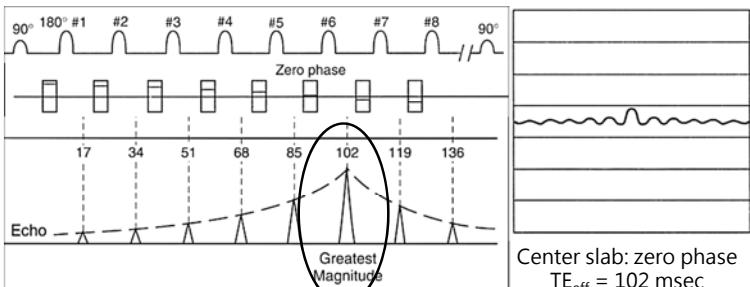

2/18/2017 Lesson 1_2, Chia-Feng Lu

12

Fast spin echo

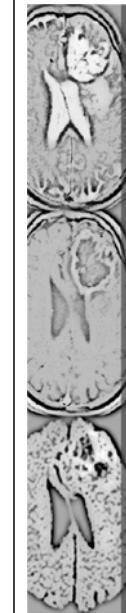

- In FSE, before each 180° pulse, we place a different value of the phase-encoding gradient.
- For the 180° pulse before the echo we choose as the TE_{eff} (in this case, 102 msec), we use a phase-encoding gradient with the lowest strength.

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

13

Multi-slice & multi-echo spin echo

(C) 5. 磁振造影傳統自旋回聲 (conventional spin echo) 脈衝序列中，若在一個 TR 內選擇 4 個切面，每個切面有 2 個回聲 (echo)，則在一個 TR 內，有幾個相位編碼梯度？

- A.1
B.2
C.4
D.8

(A) 2. 磁振造影傳統自旋回聲 (conventional spin echo) 脈衝序列中，若在一個 TR 內選擇單一切面 4 個回聲 (echo)，則在一個 TR 內，有幾個相位編碼梯度？

A.1
B.2
C.4
D.8

(B) 1. 磁振造影傳統自旋回聲 (conventional spin echo) 脈衝序列中，若在一個 TR 內選擇 2 個切面，1 個回聲 (echo)，則在一個 TR 內，開啟幾次相位編碼梯度？

A.1
B.2
C.4
D.8

(103 年第二次放射線器材學第 45 題)

Multi-echo procedure doesn't increase the phase-encoding steps.

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

14

Phase-encoding step

- Please compare to the conventional spin echo.
- Depends on both ETL and slice number in a TR.

(D) 4. 磁振造影快速自旋回聲 (fast spin echo) 脈衝序列中，若在一個 TR 內選擇單一切面且回聲列長度 (echo train length) 為 8，則在一個 TR 內，有幾個相位編碼梯度？

- A.1
B.2
C.4
D.8

(98 年第一次放射線器材學第 48 題)

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

15

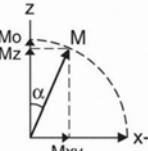

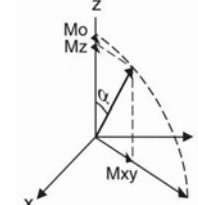

The purpose of Gradient Echo

$$\text{Scan time} = (TR)(N_y)(NEX)$$

Number of excitation (SNR)
Number of phase encoding (spatial resolution)

Repetition time: can be controlled to minimize the scan time.

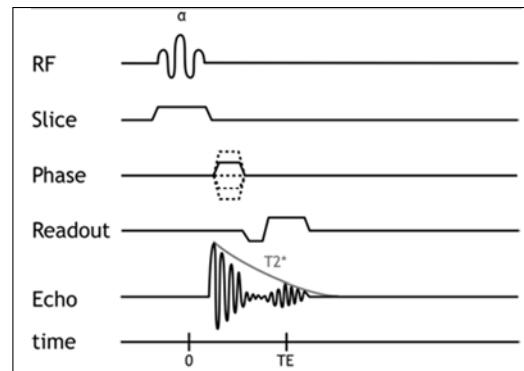

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

16

GRE Pulse Sequence Diagram

- Three operator-controlled parameters that affect the tissue contrast.

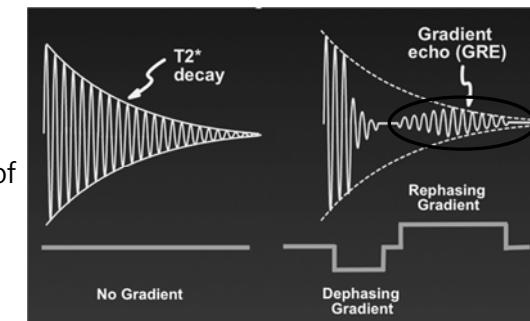

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

17

Bi-lobed Readout Gradient

- Intentionally dephase the FID and rephase (or recall) it at time of TE.
- The maximum of echo occurs at the midpoint of the positive (rephasing) lobe.

<http://mri-q.com/gre-vs-se.html>

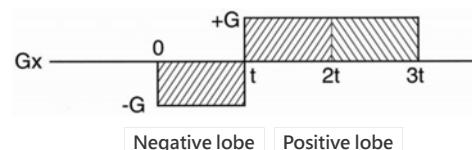

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

18

Properties of GRE

- A smaller flip angle is used instead of the 90° RF pulse
 - A shorter TR is demanded for full recovery of M_z
- Instead of 180° RF pulse, a bi-lobed readout gradient is used to obtain an echo.
 - Quicker to apply than a 180° RF pulse → reduce minimum TE
- T2* weighting is presented due to the absence of 180° RF pulse.

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

19

Tissue contrast in GRE

	T1 weighting	Proton density	T2* weighting
Flip angle	Large (70~110°)	Small (5~20°)	Small (5~20°)
TR	Short (< 50 ms)	Long (> 200 ms)	Long (> 200 ms)
TE	Short (1~5 ms)	Short (5~10 ms)	Long (15~25 ms)

In conventional gradient echo the TR does not always affect image contrast. Once a certain value of TR has been exceeded, the M_z recovers fully. Under these circumstances the flip angle and TE control the degree of saturation and dephasing respectively.

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

20

The Purpose of EPI

- Even the GRE can shorten TR, we still need several TRs to fill out one K space matrix.
- Can we fill out one K space matrix within a TR?
 - To do so, we need to manipulate the phase-encoding and frequency-encoding gradient.

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

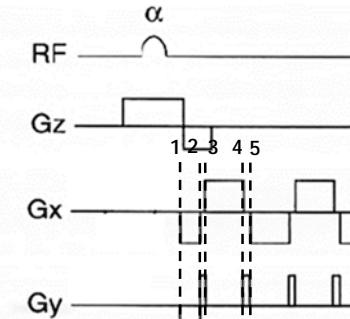

2/18/2017 Lesson 1_2, Chia-Feng Lu

21

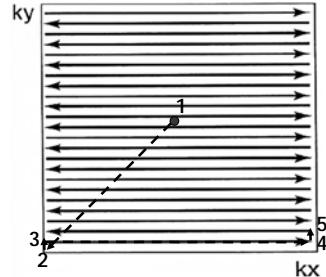

Single-shot EPI

- The phase-encode gradient is subsequently applied briefly during the time when the readout gradient was zero ($200 \mu\text{sec}$).

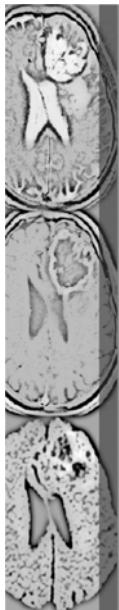

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

An odd-even coverage of k-space
ky

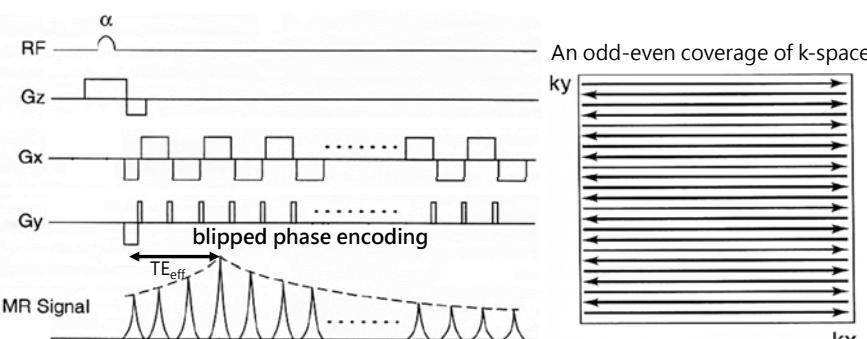

2/18/2017 Lesson 1_2, Chia-Feng Lu

22

Single-shot EPI

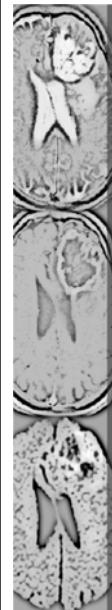

- The phase-encode gradient is subsequently applied briefly during the time when the readout gradient was zero ($200 \mu\text{sec}$).

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

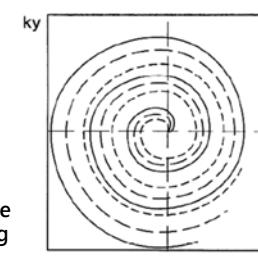

2/18/2017 Lesson 1_2, Chia-Feng Lu

23

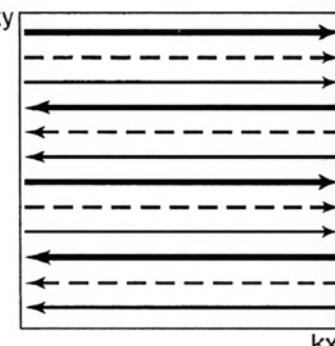

Multi-shot EPI

- Also called segmental EPI
- The readout is divided into multiple shots or segment (N_s)
 - $N_y = N_s \times ETL$

A spiral coverage (using oscillating G_x and G_y)

An interleaved coverage of k-space
ky

2/18/2017 Lesson 1_2, Chia-Feng Lu

24

Contrast in EPI

- Contrast in EPI depends on the "root" pulsing sequence
- SE-EPI (90° - 180° -EPI)
- GRE-EPI (α° -EPI)
- IR-EPI (180° - 90° - 180° -EPI)
 - inversion-recovery (IR)

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

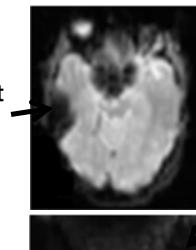

2/18/2017 Lesson 1_2, Chia-Feng Lu

25

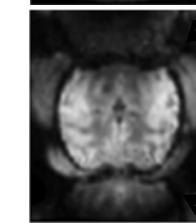

Artifacts in EPI

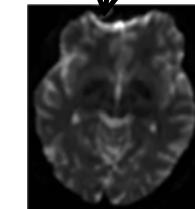

Signal Dropout

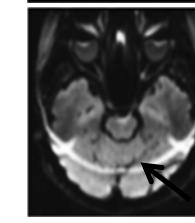

Ghosting

Distortion

Chemical shift
(must add fat sat
when using EPI)

<http://www.ym.edu.tw/~cflu>, Textbook: MRI The Basics, Hashemi et al.

2/18/2017 Lesson 1_2, Chia-Feng Lu

26

THE END
