## Complex Learning Process

- Two-person **Educational Neuroscience**
- The teacher-student interaction

Teaching and Learning Brain??

2016/10/13 Chia-Feng Lu

[HTTP://WWW.YM.EDU.TW/~CFLU](http://WWW.YM.EDU.TW/~CFLU)

3

## Let's begin, shall we

Another talk, I know...

You are ready to yawn,  
Oh, you are doing now....

No one dares to say sometimes "Learning"  
is boring and frustrating...  
But it is true....

2016/10/13 Chia-Feng Lu

[HTTP://WWW.YM.EDU.TW/~CFLU](http://WWW.YM.EDU.TW/~CFLU)

2

## New Tool for Neuroscience

Functional Near-Infrared Spectroscopy (fNIRS)

- Neuroscience tools
- Principles of fNIRS
- Applications in neuroscience
- Perspectives of fNIRS future

# Monitoring Brain Activity

- High temporal resolution
- Neural activity
- Superficial cortex
- Semi-open/close environment
- Low cost
- Physiological noise
- Electronic noise

- Low temporal resolution
- BOLD signal
- Superficial & deep cortex
- Close environment
- High cost
- High spatial resolution
- High tissue contrast
- Magnetic and posture limitation

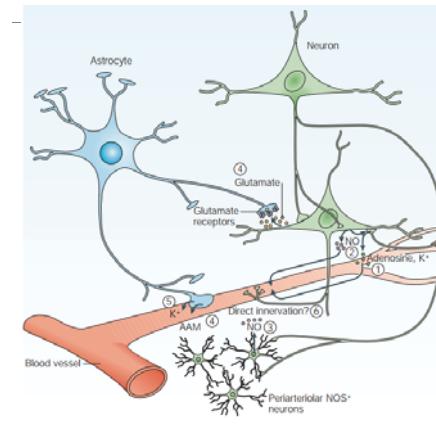

- High temporal resolution
- Hemoglobin oxygenation
- Superficial cortex
- Open environment
- Low cost
- Wearable system

2016/10/13 Chia-Feng Lu

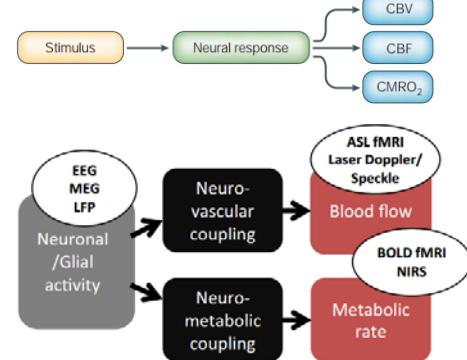

[HTTP://WWW.YM.EDU.TW/~CFLU](http://WWW.YM.EDU.TW/~CFLU)

31

## Dual Tasks

- In daily life, mobility requires walking while performing a cognitive or upper-extremity motor task.
- The theory of multiple resource models
  - The dual-task interference is minimal if 2 tasks use differing functional resources (Pashler H, 1994).
- The capacity-sharing theory & bottleneck theory
  - Performing 2 tasks with similar cognitive or motor demands can cause retardations in both tasks or delays in the secondary task (Ruthruff E, 2001; Tombu M, 2003).

37

## Generalized Anxiety Disorder

- A chronic and common mental disorder.
- Excessive worries and muscle tension** have been reported as the most specific symptom associated with GAD.
- Worry has been found to significantly change activities of primary motor cortex (M1) and corticospinal motor responses to magnetic stimulation in M1 (Oathes DJ, 2008).

**M1 → A reliable biomarker for GAD??**

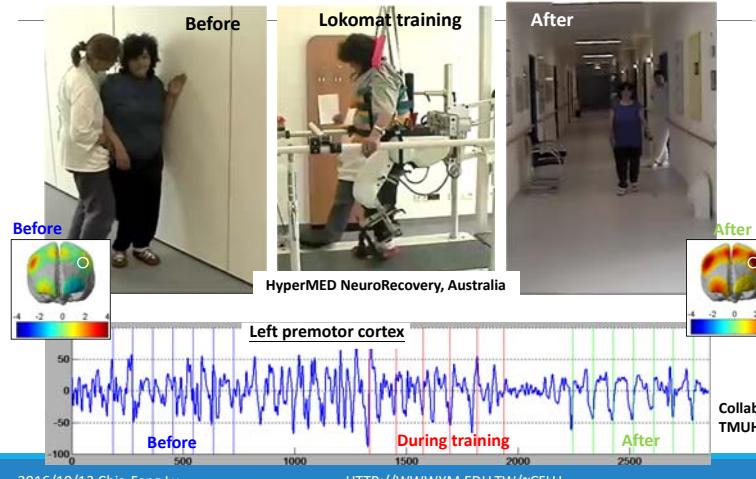

Collaborate with Prof. Cheng-Ta Li, TVGH.
